ACADEMIC PROJECT

Title   **: NOISE REDUCTION IN IMAGES & VIDEOS.**

Project Description :
- Project on, we tend to propose a computationally efficient algorithmic program for video denoising that executes temporal and spatial redundancy.
- The proposed method is based on local means of thresholding (TLM).
- Thresholding techniques have been successfully applied in different images and videos for denoising application.

Scope of the Project :

- To use high performance algorithm and then remove various noises from different colors and videos.
- To explain numerous types of noise models and filter techniques .Filters are used to remove the noise from images and videos.

TECHNICAL SKILLS

- CORE JAVA
- Manual Testing
- JAVA 1.8 features
- Automation testing by using SELENIUM tool.

SKILLS AND ABILITIES

- Good at Communication Skills
